

Sample Document

A short demo that exercises everything the renderer handles. Render it with:

```
node scripts/md2pdf.mjs examples/sample.md
```

and a `sample.pdf` appears next to this file.

Text formatting

Regular text with **bold**, *italic*, `inline code`, and a [link](#).

Block quotes render with the extension's left rule and grey text.

A table

Feature	Supported	Notes
Headings	✓	With anchor ids for internal links
Syntax code	✓	via <code>highlight.js</code>
Mermaid	✓	fenced <code>``mermaid</code> blocks
Embedded SVG	✓	resolved relative to the Markdown file

Syntax highlighting

```
export function greet(name) {  
  const who = name?.trim() || "world";  
  return `Hello, ${who}!`;  
}
```

Task list

- ☒ Parse Markdown with `markdown-it`
- ☒ Render Mermaid diagrams
- ☒ Embed relative images and charts
- ☐ Your next document

Mermaid diagram

Embedded chart

An SVG kept alongside the document in `content/`, referenced by a relative path, is embedded into the PDF:

Pages rendered per run
